Hand Rehabilitation

Hand Rehabilitation in Brooklyn

Our hands are marvelous. With uncommon dexterity they can perform the most minuscule tasks. We rarely think of these gifts until common tasks like using your computer keyboard, writing, or cooking begin to cause pain and discomfort.

There's no reason to suffer any longer. Hand rehabilitation treatment by an expert hand therapist can help you return to the quality of life you desire.

Our hand rehabilitation process helps you to regain your full range of motion, flexibility and strength. Throughout our hand physical therapy sessions, we motivate you, help you build confidence, and most importantly, restore your dexterity and independence!

Let our experienced and attentive staff help you with elbow rehabilitation for:

- Carpal Tunnel
- Repetitive Strain Injuries (RSI), Repetitive Stress Injuries
- Post Wrist Fractures

Schedule Your Hand Rehabilitation Appointment

Contact our office today to make an appointment to discuss hand rehabilitation and whether hand physical therapy may be right for you. Please call **(718) 855-1543**, or use the appointment request form on this page.
